SAN JUAN DE PUTTO RICO, Dec. 10.— Gen. Guy V. Ilenry, military governor of the department of Porto Rico, in a series of letters to the council, gives further details of the policy which the mayors are nrged to maintain in the interest of public heaith and

in the interest of public health and order.

He points out that their responsibilities have increased with the increase of their field of action. No person is to be imprisoned without specific charges being preferred; all persons movi in prison without such charges against them are to be freed; customs duties and money values must be regulated by the Unitary of the company of th in the United States.

In a second letter the military governor says:

"I am anxious to have the people feet that they can be directly reresented here for the purpose of complaints, grievances and recommendations. At present there seems to be a feeling that the island is ruled by one-man power, which is a relie of the Spanish system. I desire to learn, so far as possible, the views of the people; and I, therefore, instruct the council to inform the mayors that they may send here on or before December 19 two delegates from each mayoraty, one liberal and one radical, to be chosen by the respective municipal councils.

In the case of a town where the two political parties do not exist, or where one does not, its mayor and council may choose non-partians in their best discretion. The object is to enable me to come into direct contact with the people. I reserve to myself absolute right to act as I see fit on the recommendations of such delegates and shall not be influenced regarding them by men now in office. I shall listen to the voice of the people through their delegates and shall examine and councider what they labertone that an unnecessary number of officers are now connected with the various councils."

mittee does not wish to be behind the military committee of the house in ear-gring out the president's recommendations and it is expected that a bill will soon be ready for the house.

The new construction is for three battle ships of 13,000 tons and great steaming radius; three 13,000 ton armored cruisers, and six protected cruisers of \$0,00 tons each. For service in the waters around our insular possessions. These were recommended by the burean of construction, and while the committee had not finally seted upon the matter the fact that it will do so has been very clearly indicated at the two informal meetings of the committee held this week.
